Detail Introduction :

Advanced Cookie Machine

The advanced PLC and Servo Controlled cookies machine is the new kind of shape forming machine, which are automatically controlled. We used the SERVO motor and SUS304 stainless steel outside. This machine can produce dozens of kinds of design cookies or cakes as option. It has memory stored function; can store the cookies types you made. And you can set the cookie forming ways (depositing or wire cutting), working speed, space between cookies, etc by touch screen as you need. We have more than 30 kinds of nozzle types for choice, the customers can choose according to their need. Taking shape design snacks and cookies have unique form and handsome appearance. The green body made by this machine can bake through hot air rotary oven or tunnel stove.
