Detail Introduction :

Semi-auto Starch Mogul Line

Product Description

The CLM-S Series Semi-auto starch mogul line is specially designed and customized for small or middle scale production requirement. According to the starch mold jelly/gummy candy processing technology, Semi-auto starch mogul line consists three main parts: cooking unit, starch cavities making and depositing, de-starch and drying unit. Each unit can be customized as per the automation and capacity requirements.

The Semi-auto starch mogul line can make single color, two colors up and down, two-color side by side, multi-color (optional) starch jelly candy or gummy candy, controlled by PLC and Servo (option). High-quality products can be made by this machine.
