High Efficiency 300~500 kg/h Automatic Drying System Full Automatic

Specifications :

Payment Terms	L/C T/T Western Union
Keyword	Automatic Drying System, Marshmallow Production Line

Detail Introduction :

Automatic Drying System

Product Description

The Automatic drying system is ideal equipment for automatic drying processing instead of drying trays for gummy candy drying or marshmallow drying. There are 240m conveyor which can make the candy drying for 4~8hours or can be customized for longer time.

The Automatic drying system equip with the combined air conditioner and dehumidifier The gummy candy or marshmallow will be average dried due to the rotating action from upper layer dropping to lower layer. High efficiency, No Labor Required, Fully automatic, much better drying performance are the strong point for this kind of equipment.

Automatic Drying System Model: CGZ800,CGZ1000,CGZ1200,CGZ1400 For different width of the conveyor.

TMHT Series Full Automatic Marshmallow Production Line (Cotton Candy Line)
SINOFUDE is proud to develop the model TMHT600/900/1200 Full automatic marshmallow processing line that is a complete plant for continuously producing various kinds of cotton candies (marshmallow), which comes in a variety of colors and shapes. Alternative with depositor and extruder, the center filled marshmallow and twist type or carton shape multi color marshmallow can be made in the same line.

Automatic Drying System SPECIFICATIONS:

Model	TMHT600	TMHT900	TMHT1200
Capacity (kg/h)	60~100	150~200	300~500
Cutting length (mm)	10~800 (Extrude and Cut Type)		
Steam consumption (kg/h) Steam pressure (kg/h)	250 0.2~0.6	400 0.2~0.6	500 0.2~0.6
Electric power needed	35kW/380V	45kW/380V	55kW/380V
Compressed air needed. Compressed air pressure	0.8m3/min 0.6-0.8MPa	1m3/min 0.6-0.8MPa	1.5m3/min 0.6-0.8MPa
Gross weight (kg)	6000	8000	10000
Length of the line(m)	30	35	40
