Composition and function of Automatic Boba Making Machine.

Composition and function of Automatic Boba Making Machine.

- 1 Adopt PLC control system, fully automatic design.
- 2 The machine, electricity, gas, and control are integrated, and the electrical components, motor, and electrical box are made of stainless steel with waterproof and splash-proof treatment.
- 3 The filter is made of Teflon and sealed by aramid cloth.
- 4 The structure is reasonable and compact, with a high degree of automation.
- 5 High production efficiency, the production of popping beads with bright color, round and beautiful appearance, delicious taste.
- 6 Equipped with the developed system, it can realize fully automatic operation, and after many improvements, the operation is more simple and convenient.
- 7 Manufactured according to the food GMP standard, which makes it easy for food companies to pass the food industry GMP, HACCP, QS, and other certifications.

Advantages of Automatic Boba Making Machine.

1. Adopt a PLC control system, fully automatic design.
2. All made of stainless steel, in line with food hygiene standards.
3. Combined with the production process of popping beads, the popping beads produced are bright in color, round and beautiful in appearance, and delicious in taste.
4. It is usually composed of a blending system, forming system, filtering system, cleaning, and curing

system, filling and sealing system, sterilization system, PLC control system, etc.

5. Popping beads is a special technology to the juice and others wrapped in film, boiling, cooling, drying and other processes to produce natural ingredients, when the external force slightly squeezed, popping beads break apart, the flow of juice inside, good taste so that every customer is impressed.

6. popping beads production process is a simple, wide range of applications.

Boba Maker Machine is a collection of technology development, design, pre-sales, and after-sales service as one of the food processing enterprises. We actively introduce new technical talents, constantly improve on the original technology, backed by strong technical strength, and strive to reward every customer with excellent quality. Looking forward to your call!
